Editorial: Members of the Prescrire Editorial staff sign a yearly declaration of absence of conflicts of interest, in accordance with Prescrire’s “Non merci...” Charter. Members are free from any interest connected to the realization of Prescrire’s objectives (the Charter and the Declaration are available online at line:english.prescrire.org).

Publishing reliable reviews that is easy to use and adapted to readers’ needs depends upon complex editorial procedures, initiated and overseen by the members of Prescrire’s Editorial Staff: define editorial goals. They oversee the literature search, the writing and rewriting of texts, and the review by a panel of outside experts (medical specialists, methodologists, representatives of Prescrire’s subscriber base...). They organize national and external quality control panels, and edit the final copy. Every draft is submitted, before publication, to a large number of outside reviewers.

Details on how Prescrire’s content is produced are available online at the Prescrire in English website (english.prescrire.org) see the “About Prescrire” section, “How we work.”

Review Panel: The following persons reviewed the articles, which were first published in Prescrire and then translated for this issue of Prescrire International:
